

REMARKS

1. The claims have been amended to patentably define over the prior art.
2. Neither Nitenson (3,417, 719), Jasse (3,098,446) or Eksbergian (2,405,415) alone, or in combination teach the claimed combination of resilient fins being retractable and mounted at an angle and cantilevered in order to impart a stabilizing spin to the self-propelled projectile when interfaced with water and/or air.

3. Therefore allowance of the Application is requested.

Respectfully submitted,
